

20 Page Album

You design **40** page sides

Important Notes:

- **Page 1** (the first page you design) is a right hand page. It is by itself and has no left hand page opposite it.
- All remaining pages (except the last page) are in "facing page pairs". For example: 2 on the left, and 3 on the right; 4 left and 5 right; and so on.
- The **last page** is a left hand page. It is by itself and has no right hand page opposite it.
- Albums are listed by the number of pages they contain. Be sure to note that each page has two sides (front and back) that you will create a page design for. You design twice as many "page sides" as you have pages. For example, a 12 page book will have 24 page sides that require a page design created by you and ordered.
- Please **watch the training video** and note how the Review Order window is used to check and adjust pagination (the order and number of pages in the album).
